## e-Box Features

### Reliable, secure email and Internet

- The e-Box is a hands-free, dependable solution that provides secure connection to the Internet and a managed email service for all your users.
- The e-Box is installed, managed and maintained by TSI.

### Reduces your risk

- Built-in virus protection ensures that all email entering the e-Box system is filtered. Any email containing viruses or other harmful content is trapped. And a built-in network firewall ensures that only authorised traffic enters and leaves your network.

### Automatic off-site data backup

- The e-Box can securely and automatically back up your valuable business data over the Internet.

### Work from anywhere (VPN)

- The e-Box Virtual Private Network solution lets employees work remotely by providing access to their data at any time and wherever they are, via the Internet.

### Tried and tested technology

- Based on a solid and proven platform, we have been installing e-Boxes since 1998.
- The e-Box undergoes continual research and development, thus keeping up with new technologies such as high-speed wireless networking.

### No lock-in

- You do not need to sign a lengthy contract; TSI only needs one month's notice if you are unhappy with the e-Box service.
- You pay a monthly fee for the e-Box service.
- The e-Box remains our property and we will replace it at no charge if it fails.

### More e-Box advantages

- Works with a variety of connection types. We will use the best available service in your area. (Note: the network connection and/or data fees are not included in the e-Box fee).
- Your staff does not spend time on email and Internet management issues.
- Downtime is reduced with on-line remote support from TSI - all part of the deal.
- The e-Box service can handle the volume of email your company generates as it grows.
- The e-Box has the capability to handle your faxing requirements.

Email and Internet made easy for your business!
